***Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-59, drawn to a microfluidic device including means to regulate or vary operation of the device, classified in class 137, subclass 825+.
  - II. Claims 60-88, drawn to a method of forming a microcapillary network (microfluidic device), classified in class 977, subclass 840+.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the microfluidic device of the claims of Group I can be made by a materially different process (i.e., not including a step of removal of material which has been heated) other than that recited in the claims of Group II.
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
